

Nicholas Mariani

AI technical operator and automation builder. Six case studies with synthetic interactive reconstructions, readable evidence and qualified delivery claims.

The ZIP is the primary portfolio.

Google Drive does not resolve relative links inside a standalone uploaded HTML file. For the full experience, use the self-contained ZIP.

1

Download the ZIP

[Open Nicholas Mariani Portfolio.zip on Drive](#)

2

Extract it

No installer, server or build step is required.

3

Open START_HERE.html

Use the hub to run all six demos and browse PNG/PDF evidence offline.

Every interactive screen is a synthetic reconstruction based on real delivery patterns. No production or client data is included.

A complete funnel built in three days

A tailored launch path connecting acquisition, VSL and opt-in, webinar registration, CRM routing and follow-up.

STACK

GoHighLevel · Airtable · webhooks · Meta Pixel · GTM

VERIFIED STATEMENT

The full path was delivered in three days. No revenue claim is attached.

Screenshot from the included standalone demo. Synthetic interactive reconstruction based on real delivery patterns. No production or client data.

Airtable systems across business units

A relational operating model for leads, applications, buyer status, ownership, touchpoints and service cases.

STACK

Airtable · GoHighLevel · ActiveCampaign · Zapier · n8n

VERIFIED STATEMENT

Marketing, sales and service could work from a shared operating record.

Payment tooling and CRM analysis

Internal payment operations plus discovery, mapping and normalization across heterogeneous spreadsheet sources.

STACK

Google Workspace · Apps Script/JS · Node.js/Python-assisted ETL · APIs

VERIFIED STATEMENT

The source audit documented 178 of 180 sources. This is coverage, not a commercial result.

05 / 10

Self-hosted automation on Docker and VPS

A controlled, self-hosted workflow environment with routing, queues, retries, logging and scheduled reconciliation.

STACK
Docker · VPS · n8n · Traefik · Redis · Cloudflare Tunnel

VERIFIED STATEMENT
A nightly reconciliation workflow was operating from March 2026.

Screenshot from the included standalone demo. Synthetic interactive reconstruction based on real delivery patterns. No production or client data.

Meta tracking and funnel diagnostics

A diagnostic layer joining UTMs, browser events, custom conversion logic and CRM stages.

STACK

Meta Business Manager · Pixel · GTM · Cloudflare/DNS · Airtable

VERIFIED STATEMENT

Missing-UTM and routing issues were resolved, restoring usable operational attribution.

Screenshot from the included standalone demo. Synthetic interactive reconstruction based on real delivery patterns. No production or client data.

Stores, websites and lifecycle campaigns

Owned stores and client delivery spanning acquisition, checkout, onboarding, retention and reactivation.

STACK

Shopify/page builders · Meta advertising · email/SMS · automation

VERIFIED STATEMENT

Four owned stores were operated within one year. Financial performance is not claimed.

Business-first technical delivery.

Direct hands-on

Airtable, GoHighLevel, n8n, Zapier, Make, ClickFunnels, Google Workspace, Slack automation, Cloudflare, Docker/VPS, Meta Pixel, GTM, CRM and funnel operations.

AI-assisted development

Front ends, scripts, API integrations, data normalization, automation logic and operating tools built under human supervision and testing.

Working knowledge

REST APIs, webhooks, JavaScript/Apps Script, Python and Node.js-assisted workflows, HTML/CSS, SQL/data modeling, Supabase and agent architecture.

Creative tools

Adobe Premiere and Photoshop, DaVinci Resolve Studio, Higgsfield, ElevenLabs and generative models for image, video, voice, music and sound.

The portfolio qualifies AI-assisted building separately from traditional software engineering. Client names, source files, credentials, account IDs, spend, audiences and unsupported financial metrics are excluded.

Six demos. Fourteen visual assets. Six PDF boards.

The offline pack includes the START_HERE hub, six standalone interactive HTML demos, high-resolution PNG evidence, editable SVG source files and readable PDF evidence boards.
